POOLE'S INDEX ABRIDGED.

What it Includes; its Advantages to Libraries.

It is not now expected that the **ABRIDGED POOLE** will be published until May 1, 1901. The price, though not yet announced, will hardly be over $10.00, and may be less if the advance orders justify it. Every library needs this volume. **Let us book your order now for an early copy.**

The unexpected delay in publication will really be an advantage to libraries, since more time will be given for the completing of the broken files of the sets to be indexed. The publication will undoubtedly cause a rise in price on the sets indexed, as all are largely "out-of-print," and must be gotten together by long and persistent search. We have anticipated this demand, and laid in a good stock of the periodicals to be indexed in the Abridgment, and can on request make you favorable quotations upon nearly all. We will send you a check-list of the thirty-seven serials to be indexed if you desire us to estimate for you on any.

Scope and Use.

For the information of those who have not seen our former circulars, we say here that Poole's Index Abridgment covers all the subjects treated in the thirty-seven sets most commonly in our smaller American libraries. It covers these sets from first publication to the end of 1899, and in one alphabet, in one volume. **It will admirably meet the needs of small and growing libraries,** where the prospect of having all the "Poole" periodicals is very poor. It will cover what they have, or can readily get; it will answer all ordinary reference questions.

For large public, and college libraries its use will be constant on account of the ease of reference (one place to look instead of seven), and because the **ABRIDGMENT** will answer all ordinary demands.

Order now, and send to us for a check-list of sets to be included in

POOLE'S INDEX ABRIDGED.

Bulletin of Bibliography

VOL. 2 JANUARY, 1901 No. 6

This Bulletin is published, primarily, as a means of communication between the Boston Book Company and its customers. A constant endeavor will be made, however, to include in each issue enough original matter of sufficient value to induce librarians to preserve and bind up the numbers. Each volume will be provided with a title-page and an index.

No subscription price will be put upon the journal, and numbers will not be sold. It will be sent to a selected list of libraries, customers or likely to become customers of the Boston Book Company. The circulation of the Bulletin will be increased in proportion to the interest shown in it, and in the special work of the Library Department of the Boston Book Company. Correspondence is solicited, and should be addressed,

The Boston Book Company,

EDITORIAL COMMENT.

AT the threshold of a new century, we pause to wish all our readers happiness and prosperity. Thanking our many library friends for past patronage, we promise to continue to use our best efforts to satisfy the most exacting, and to make more than ever synonymous the phrases "BOSTON BOOK COMPANY" and "COLLECTED AND PERFECTED SETS OF PERIODICALS."

THE BULLETIN OF BIBLIOGRAPHY begins the twentieth century with the assurance that its quarterly visits have been welcome and its contents useful in many libraries. Contributions of a bibliographical nature, suitable for its pages will be gratefully received. Its circulation is confined to libraries, its mission is primarily to advertise the business of the Boston Book Company. An order now and then from its pages will ensure its receipt regularly, and render its continuance certain.

The most important events in the bibliography of serials this year will be the publication of an Abridged Poole's Index, and an Index to theological serial literature. Is your library prepared to use these books to the best advantage—that is, have you the sets that will be indexed by them?

NOTE.—Mr. Bartram was an enthusiastic self-taught naturalist and collector. This catalogue gives 289 species of birds as determined by Lieut. Savile G. Reid and 149 of shells, the major part of the names being given by Prof. J. J. Rein, of Frankfort, Germany. In the Bermuda Library, at Hamilton, is preserved Mr. Bartram's Descriptive Catalogue of Bermuda shells. It is an autograph MS. copy written on 28 sheets of paper (31. 1 x 19. 8 cm. in size), which bears evidence of having been once bound in a blank book. It enumerates and describes 149 varieties of shells, and is closely and legibly written, containing about 35 lines to the page.
